

Dear Miklós at 70 !

(Short message from PL)

Tihany, 18 June 2019

Dear Miklós,

You reached an age, when every day could be a present from the LIFE, because you can see the results of your achievements, coming from your inner motivations.

You can see with satisfaction your successful pupils, your aging students and followers in this way, since their success is your success – and you are not responsible for their failure, because they simply did not follow your wise advices.

This is fine, this is why it is worthwhile to live a long life. Furthermore, this is why physicists have a lucky profession, where these successes can be identified easily and the original father can be traced back and identified clearly.

And you were traced back!

**I send you the message, that you were identified and you are granted.
Even more, it was/is/will be great to enjoy for a long time
your radiation and intellectual heat.**

**I personally appreciate to enjoy this heat for the last 20 years
(our first paper was published in 1998), which period overlaps
with my peak activities and gave me so much enjoyments.
The days spent together in Pulham, in New York, in Brookhaven,
in Berkely, in Budapest just burned my brain deeper and deeper,
and now I can not imagine my life without carrying these scars.**

Many thanks for them, I will wear them with honour and pride.

**Unfortunately, every good act wins its penalty – so today
I can not enjoy this fiesta together with you
and other good friends around you. But this does not matter.**

Houston!
We got a problem!

**The main point is that you are with us (which is a miracle)
and hopefully will stay with us for many years.**

I will try my best not to skip the Miklós-80. I promise!

Thinking on the next problem – even at 70 !
Satisfaction is guaranteed !

**Finally I wish you wonderful years with your superb family,
with your superb wife, Györgyi and all family members.**

**Enjoy! As you did so far, teaching us
how to live a wonderful life
in a harsh and rude enviroment!**

With My best regards, Peter

Blue Sky for 45 years! Congratulation Miklós and Györgyi!
